(54) Title: A METHOD FOR MONITORING THE HEALTH OF A PATIENT

(57) Abstract

The present invention relates to a method for monitoring the health of a patient by utilizing measurements. In order to improve the contact between the patient and the person treating him, the results of the measurements are supplied via a communications device (1) utilizing a wireless data transmission link to a data processing system (9) available to the person monitoring the patient's health, and the patient's health is monitored by means of the data stored in the data processing system (9).
